

**BAY ISLE POINTE GUTTER & DOWNSPOUT ARCHITECTURAL**  
**CONDITIONS 8/03**

1. If exposed roof eave beams are present on your home (no fascia board attached, present in Bay Isle Pointe homes, not Victoria Bay homes), they are to be painted the siding color of the home and gutters attached thereto are to be painted the trim color, or accent color if an approved accent color is approved for your home.
2. Gutters (including factory pre-painted) are to be painted using the same paint and same paint color as the surface to which they are adjacent (trim or accent color if an accent color is approved for your home). (See exception in #1 above applying to gutters on exposed roof eave beams).
3. Downspouts (including factory pre-painted) are to be painted using the same paint and same paint color as the surface to which they are adjacent (trim where crossing over/attached to the trim color or siding color where crossing over/attached to the siding color). Galvanized steel or aluminum are the approved materials for downspouts. All downspouts on the home must be of the same style, size and material.
4. Original developer curved gutters and 1-3 straight faced ribbed gutters in same size as original developer installation are allowed. All gutters on the home must be of the same style, size and material.
5. Where downspouts cross over brick, they are to be painted using the same paint and same color as the siding on the home.
6. Gutters and roof fascia boards are to be the same trim or accent color (if accent color is approved for your home).
7. Must be in full compliance with applicable section(s) of the Bay Isle Pointe Architectural Guidelines adopted February 21, 2001 and any amendments thereto. Any deviations there from are not approved unless otherwise noted herein.
