Wide Doors

20'
Wide Doors*

All doors shown are 7' tall and consist of 4 horizontal sections. Doors taller than 7' require more sections.

Windows with decorative window inserts are typically placed in the top section.

If plain glass windows are requested, they are typically placed in the 3rd section from the bottom, however, windows may be placed in any section desired.

For more information, ask your dealer or consult Amarr's Window Design Trim Guide.

*WeatherGuard not available in 20' width.
